SVENSKA GEOFYSISKA FÖRENINGEN

Tellus

A QUARTERLY JOURNAL OF GEOPHYSICS

Volume 5 · 1953

Printed and Distributed by Generalstabens Litografiska Anstalt
Stockholm, Sweden 1953

Editor:

C.-G. ROSSBY

CONTENTS

Volume 5, 1953

Number 1 — February 1953

CHR. JUNGE — Die Rolle der Aerosole und der gasförmigen Beimengungen der Luft im Spurenstoffhaushalt der Troposphäre 1
V. J. SCHAEFER — Cloud Forms of the Jet Stream 27
A. C. BEST — The Relative Humidity in Radiation Fog 32
J. WARNER and E. G. BOWEN — A new Method of Studying the Fine Structure of Air Movements in the Free Atmosphere 36
R. R. LONG — Some Aspects of the Flow of Stratified Fluids. I. A Theoretical Investigation 42
N. G. JERLOV — Influence of Suspended and Dissolved Matter on the Transparency of Sea Water 59
H. RIEHL and S. TEWELES, JR — A Further Study on the Relation between the Jet Stream and Cyclone Formation 66
PH. F. CLAPP — Application of Barotropic Tendency Equation to Medium-Range Forecasting 80
R. BERGGREN — On Temperature Frequency Distribution in the Free Atmosphere and a Proposed Model for Frontal Analysis 95
F. LINDHOLM — Expectancy of Clear Days in the Central Zone of Total Eclipse of the Sun June 30, 1954, in Sweden 101

Shorter Contributions

V. P. STARR — Note on the Classic Stability problem 105
Letters to the Editor 107

Number 2 — May 1953

M. BÅTH — Comparison of Microseisms in Greenland, Iceland, and Scandinavia 109
E. Å. BRUNBERG — Experimental Determination of Electron Orbits in the Field of a Magnetic Dipole 135
C. C. WALLÉN — Variability of Summer Temperature in Sweden and its Connection with Changes in the General Circulation 157
S. SYŌNO — On the Formation of Tropical Cyclones 179
A. ELIASSEN and W. E. HUBERT — Computation of Vertical Motion and Vorticity Budget in a Blocking Situation 196
B. BOLIN — Multiple-Parameter Models of the Atmosphere for Numerical Forecasting Purposes . . 207
S. J. SMEBYE — Tendency Computations with a Continuous two Parametric Atmospheric Model . . 219

Number 3 — August 1953

R. FJØRTOFT — On the Changes in the Spectral Distribution of Kinetic Energy for Twodimensional, Nondivergent Flow 225
S. PETTERSSEN — On the Relation between Vorticity, Deformation, and Divergence and the Configuration of the Pressure Field 231
E. N. LORENZ — The Interaction between a Mean Flow and Random Disturbances 238
K. HINKELMANN — Zur numerischen Wettervorhersage mittels Relaxationsmethode unter Einbeziehung barokliner Effekte I 251
H. NORINDER and R. SIKSNA — On the Electrification of Snow 260

E. Å. Brunberg and A. Dattner — Experimental Determination of Electron Orbits in the Field of a Magnetic Dipole. II 269
L. Dufour and R. Defay — Sur la formation des germes de condensation et de solidification autour d'un noyau solide insoluble 293
B. Kullenberg — Absolute Chronology of Deep-Sea Sediments and the Deposition of Clay on the Ocean Floor 302
N. G. Jerlov and B. Kullenberg — The Tyndall Effect of Uniform Minerogenic Suspensions ... 306
N. G. Jerlov — Studies of the Equatorial Currents in the Pacific 308
Notes 315

Results of investigations conducted at the Institute of Meteorology, University of Stockholm, during the Academic Year 1952—1953

C. W. Newton and J. E. Carson — Structure of Wind Field and Variations of Vorticity in a Summer Situation 321
K. Mohri — On the Fields of Wind and Temperature over Japan and Adjacent Waters during Winter of 1950—1951 340
W. E. Hubert — A Case Study of Variations in Structure and Circulation about Westerly Jet Streams over Europe 359
B. Bolin — The Adjustment of a Nonbalanced Velocity Field towards Geostrophic Equilibrium in a Stratified Fluid 373
G. Arnason — A Baroclinic Model of the Atmosphere Applicable to the Problem of Numerical Forecasting in Three Dimensions. II 386
G. Hollmann and H. Reuter — Ueber die Genauigkeit verschiedener Approximationen der horizontalen Windkomponenten 408
L. A. Vuorela — A Synoptic Study of Deformation Fields 413
Notes 420

Number 4 November 1953

H. Alfvén — Identification of Sunspots 423
B. J. Mason — A Critical Examination of Theories of Charge Generation in Thunderstorms ... 446
W. Dansgaard — The Abundance of O^{18} in Atmospheric Water and Water Vapour 461
W. A. Mordy — A Note on the Chemical Composition of Rainwater 470
H.-L. Kuo — On the Production of Mean Zonal Currents in the Atmosphere by Large Disturbances 475
V. P. Starr — Note Concerning the Nature of the Large-Scale Eddies in the Atmosphere 494
K. Hinkelmann — Zur numerischen Wettervorhersage mittels Relaxationsmethode unter Einbeziehung barokliner Effekte II 499
R. Frost — A Power Law Representation of the Heat Transfer in the Lowest 100 metres of the Atmosphere 513
A. Nyberg and L. Raab — A Remark on the Energy Transport from a Warm River Surface into Cold Air 529
Letters to the Editor 533
Index 1953 535
